ABSTRACT

Disclosed are crystals, crystal structure FcyRIIa protein, three dimensional coordinates of FcyRIIa protein, and structures and models derived from the FcyRIIa structure. Also disclosed are crystals of FceRI protein and three dimensional coordinates of FceRI protein monomers and dimers derived from the FcyRIIa structure. Also disclosed are three dimensional coordinates of FcyRIIIb proteins and models of FcyRIIIb derived from the FcyRIIa structure. The present invention also includes methods to produce such crystals, crystal structures and models. Uses of such crystals, crystal structures and models are also disclosed, including structure based drug design and therapeutic compositions.
